

Managing **cash** in society.

How to download & use Google Authenticator

myLoomis
Customer Portal

To use the portal safely and keep your account secure, Loomis requires the use of Google Authenticator.

The app is free to install and is available for most smart devices via your app store. This helps protect your account when logging in and only has to be set up the first time you access the portal.

App Requirements

- The latest operating system for your device
- To turn on 2-Step Verification
- Camera access for Scanning QR Code

Download from the App Store

Scan the codes below to get the app from your app store, or alternatively, tap/click the image to visit.

Setting up Google Authenticator

- Download and install 'Google Authenticator' on your device
- Open the app and tap the '+' symbol
- Select 'Scan a QR Code'
- Scan the QR Code when you login / signup to the Portal and follow the on-screen instructions
- Once set up, enter the code generated by your device

NOTE: You will only have to do this once. Each following login will simply ask for your new code.
